PROFESSIONAL SUMMARY

Founder of ClimRisk B.V. — a climate financial risk intelligence platform automating quantified CSRD, TCFD, and IFRS S2 regulatory disclosures for enterprises. 4+ years spanning industrial GHG accounting, EU municipal climate governance, and climate-financial risk modelling. ISO 14067-accredited; expertise in Scope 1-3 inventory design, audit-ready reporting, and ESG data governance across GHG Protocol, GRI, SASB, TCFD, CDP, and CSRD. Python, QGIS, LCA practitioner.

KEY SKILLS

CSRD | TCFD | IFRS S2 | BRSR | GHG Protocol | ISO 14064 | ISO 14067 | Scope 1-2-3 | LCA (OpenLCA / Ecoinvent) | SBTi | CDP | GRI | SASB
Physical & Transition Risk Modelling | NGFS Scenarios | IPCC AR6 | WRI Aqueduct | Climate-Financial Disclosure | Regulatory Compliance
Python | QGIS | Power BI | Tableau | ESG Data Governance | Audit Documentation | Geospatial Risk Mapping

PROFESSIONAL EXPERIENCE

- Founder & CEO** • ClimRisk B.V., Netherlands (climrisk.io) Apr 2026 – Present
Climate financial risk intelligence platform; automated CSRD, TCFD, and IFRS S2 regulatory disclosures for enterprises.
- Built the CRI Engine from scratch: quantifies annualised physical Capital-at-Risk across 10 hazard types under all IPCC SSP scenarios and transition risk via NGFS Phase 4 carbon price pathways; platform live at climrisk.io with full assessment in under 60 seconds; incorporated in the Netherlands (KVK 95420134, BTW NL004902017B42).
 - Developed 16 sector-specific hazard multipliers calibrated from CDP, WRI, and IEA publications; implemented automated TCFD, IFRS S2, CSRD/ESRS E1, and BRSR disclosure outputs with full audit trail; active pilot engagement with Morelli Consulting (UK-based sustainability advisory).
- Climate Change & Sustainability Lead** • INHAF — ClimACT-Chennai Initiative Oct 2025 – Present
Multi-stakeholder climate action platform; 7-sector climate framework addressing 380M+ at-risk livelihoods across India.
- Designed climate risk research frameworks across 7 sectors, mapping physical hazard exposure (flood, heat, coastal erosion) to socioeconomic disruption; informed 3 municipal advisory engagements and contributed to Chennai's multi-stakeholder Climate Action Plan.
 - Built a 22-year longitudinal climate dataset for Chennai using QGIS and Python; coordinated data across 8 partner organisations spanning 5 sectors; producing policy-grade evidence on flood frequency and urban heat stress intensity.
- Graduate Collaborator — Climate Risk & Sustainability Policy** • Municipality of Rotterdam (C40 ICAR) Nov 2023 – Jul 2024
EU Mission on Adaptation signatory; C40 Cities ICAR programme integrating climate equity into long-term urban governance.
- Conducted asset-level climate vulnerability assessments across 250 municipal properties, integrating flood/heat exposure, criticality, and performance degradation data via GIS; findings reported through CDP and directly informed Rotterdam's adaptation framework.
 - Identified 47 high-risk assets; produced audit-ready documentation (risk matrices, confidence intervals, methodological annexes) meeting EU public sector reproducibility standards for cross-departmental policy review cycles.
- Graduate Apprentice — Carbon Accounting & Environmental Sustainability** • The Ramco Cements Ltd Dec 2020 – May 2023
Integrated cement manufacturer; 11 plants; GreenPro eco-labelled, SBTi net-zero pathway, ISO 9001/14001/45001/50001 certified.
- Architected enterprise GHG inventory across 4 facilities (ISO 14064, ISO 14067, GHG Protocol, SBTi); quantified 450,000 tCO₂e annually at 591 kg CO₂/tonne; achieved 95% third-party verification accuracy with zero audit non-conformances.
 - Led Scope 3 engagement across 54 tier-1 suppliers; conducted ISO 14067-compliant LCAs (OpenLCA/Ecoinvent) supporting GreenPro eco-label compliance; increased primary Scope 3 data coverage from 20% to 65%; modelled CBAM and carbon pricing transition risks under India's PAT scheme.

EDUCATION & CERTIFICATIONS

- Oliver Wyman Climate Change Job Simulation** — Forage — Financed Emissions, NGFS, Net-Zero Scenario Analysis Apr 2026
ISO 14067: Carbon Footprint of Products — Accredited Auditor Active
MSc Urban Environment, Sustainability & Climate Change — Erasmus University Rotterdam, Netherlands 2023 – 2024
MSc Geology — Manipal University, India 2018 – 2020
